Question Paper

This is the third of five ambitious volumes theorizing the structure of governance above and below the central state. This book is written for those interested in the character, causes, and consequences of

Online Library

governance within the state. This book sets out a measure of authority for seventy-six international organizations (IOs) from 1950, or the time of their establishment, to 2010 which can allow researchers to test

Online Library

expectations about
the character,
sources, and

consequences of
international

governance. The
international

organizations

considered are

regional (e.g. the

EU, Andean

Community,

NAFTA), cross-

regional (e.g.

global (e.g. the UN, World Bank, WTO).

Firstly, the book introduces

carefully

estimates for the

scope and depth of

authority exercised

by international governments. The estimates are unique in their comparative scope, their specificity, and time span.

Secondly, it describes describe broad trends in IO authority by comparing delegation and pooling, over time,
