

A Taxonomic Revision Of The South African Endemic Genus

Thank you for downloading a **taxonomic revision of the south african endemic genus**. As you may know, people have search hundreds times for their favorite novels like this a taxonomic revision of the south african endemic genus, but end up in malicious downloads.

Rather than reading a good book with a cup of coffee in the afternoon, instead they juggled with some infectious bugs inside their computer.

a taxonomic revision of the south african endemic genus is available in our book collection an online access to it is set as public so you can download it instantly.

Our books collection spans in multiple locations, allowing you to get the most less latency time to download any of our books like this one.

Merely said, the a taxonomic revision of the south african endemic genus is universally compatible with any devices to read

A taxonomic revision or taxonomic review is a novel analysis of the variation patterns in a particular taxon. This analysis may be executed on the basis of any combination of the various available kinds of characters, such as morphological, anatomical, palynological, biochemical and genetic.

Taxonomy (biology) - Wikipedia

Abstract. A taxonomic revision of the genus *Chaquihua* is presented confronting new material with the literature descriptions of the genus. The nymph and male imago are described here for the first time and the existing descriptions of other developmental stages are complemented. Association of larvae and winged stages is now confirmed by rearing.

Taxonomic revision of the genus *Chaquihua* Demoulin ...

The genus *Scedosporium* (previously also *Pseudallescheria*) has undergone a major taxonomic revision in the last decade on the basis of phylogenetic analysis and simplification of nomenclature.

Taxonomic Revisions - an overview | ScienceDirect Topics

The primary objective of a revision is to take an established taxonomic classification and, based upon novel data analysis, synthesise a novel ("revised") classification. Thus during the course of a revision a fundamental alteration occurs between the initial and the novel classification, i.e. new taxa may be formed, taxonomic limits

Towards Defining a Taxonomic Revision Methodology

A taxonomic revision of *Catalpa* (Bignoniaceae), a genus of perennial trees frequently used in horticulture as garden and street trees, is provided. Eight natural species and two hybrid species are ...

(PDF) Taxonomic revision of the genus *Catalpa* (Bignoniaceae)

The taxonomic revision within *Leiothrichidae* has been treated in another paper (Cibois et al., 2018). However, the comprehensive phylogeny presented here highlighted the particularity of the genus *Alcippe*, whose position relative to *Leiothrichidae* and *Pellorneidae* is not unanimously strongly supported in our analyses (see Section 4.1), and also varies among other studies (Gelang et al ...

Near-complete phylogeny and taxonomic revision of the ...

The genus *Lactarius* Pers. (Russulales) is a cosmopolitan group of Basidiomycota that forms ectomycorrhizal relationships primarily with both deciduous and coniferous trees. Although the genus has been well-studied in Europe and North America, only fragmentary researches have been carried out on Asian species. In particular, the distribution of *Lactarius* species in South Korea is poorly ...

Taxonomic revision of the genus *Lactarius* (Russulales ...

This systematic study documents the taxonomy, diversity, and distribution of the tarantula spider genus *Aphonopelma* Pocock, 1901 within the United States. By employing phylogenomic, morphological, and geospatial data, we evaluated all 55 nominal species in the United States to examine the evolutionary history of *Aphonopelma* and the group's taxonomy by implementing an integrative approach to ...

Taxonomic revision of the tarantula genus *Aphonopelma* ...

In the course of the present revision, 353 herbarium collections, comprising approximately 540 *Rocheportia* specimens, were entered into a BRAHMS data base providing information about protologues and types and retrospective georeferences if possible. Based on the combination of molecular and morphological data we propose to recognise nine species of *Rocheportia*, namely *R. acanthophora*, *R. ...*

Taxonomic revision of *Rocheportia* Sw. (Ehretiaceae ...

Taxonomic Revisions ? Revisions are presentations of new material or new interpretations that have been integrated with previous knowledge through summary reevaluation.

Kinds of taxonomic publications,taxonomic review ,revision ...

We present the first comprehensive taxonomic revision and review the biology of the olingos, the endemic Neotropical procyonid genus *Bassaricyon*, based on most specimens available in museums, and with data derived from anatomy, morphometrics, mitochondrial and nuclear DNA, field observations, and geographic range modeling. Species of *Bassaricyon* are primarily forest-living, arboreal, nocturnal ...

Taxonomic revision of the olingos (*Bassaricyon*), with ...

This is the first revision in nearly 130 years of the African genus *Pseudohydrosme*, formerly considered endemic to Gabon. Sister to *Anchomanes*, *Pseudohydrosme* is distinct from *Anchomanes* because of its 2-3-locular ovary (not unilocular), peduncle concealed by cataphylls at anthesis and far shorter than the spathe (not exposed, far exceeding the spathe), stipitate fruits and viviparous ...

Taxonomic revision of the threatened African genus ...

Dasypus is the most speciose genus of the order Cingulata, including approximately 40% of known living armadillos. Nine species are currently recognized, although comprehensive analyses of the entire genus have never been done. Our aim is to revise the taxonomy of the long-nosed armadillos and properly define the taxa. We examined 2126 specimens of *Dasypus* preserved in 39 different museum ...

Taxonomic revision of the long-nosed armadillos, Genus ...

The first modern, comprehensive revision of this genus recognizing 27 species is presented here. *Werneria heteroloba* and *W. obtusiloba* are synonymized with *W. pinnatifida*, and *W. acerosifolia* is synonymized with *W. staticifolia*. Moreover, five infraspecific names and three supraspecific names are synonymized.

Taxonomic Revision of the Neotropical Genus *Werneria* ...

the distribution of the clade. Here we present a taxonomic revision of the SE subclade of the *Humifusa* clade and polyploid derivatives that commonly occur in the eastern United States (i.e., the *O. humifusa* complex). We recognize eight taxa: *Opuntia abjecta*, *O. austrina*, *O. cespitosa*, *O. drummondii*, *O. humifusa*, *O. mesacantha* subsp. *mesacantha*,

Taxonomic revision of the *Opuntia humifusa* complex ...

A taxonomic revision of the genus *Pliosaurus* (Owen , 1841 a) Owen , 1841 b @inproceedings{KnutsenATR, title={A taxonomic revision of the genus *Pliosaurus* (Owen , 1841 a) Owen , 1841 b}, author={Espen M. Knutsen} }

A recent comprehensive revision of the taxonomy that underpins the global IUCN Red List for birds led to an increase of 10.7% (over 1000 species) in the number of recognized bird species. We assessed the implications for conservation of this revision by (1) comparing extinction risk between newly recognized and unrevised species, (2) calculating the extent to which newly recognized species' ranges are covered by Important Bird and Biodiversity Areas (IBAs) and protected areas, and (3) ...

The implications for conservation of a major taxonomic ...

A taxonomic revision of *Garcinia* section *Garcinia* (Clusiaceae) has resulted in the recognition of 13 species, two of which have three varieties each. Several species are excluded from *Garcinia*...
