Until just a few years ago, we knew surprisingly little about the 150,000 or so years of human existence before the advent of writing. Some of the most momentous events in our past - including our origins, our migrations across the globe, and our acquisition of language - were veiled in the uncertainty of 'prehistory'. That veil is being lifted at last by geneticists and other scientists. Mapping Human History is nothing less than an astonishing 'history of prehistory'. Steve Olson travelled through four continents to gather insights into the development of humans and our expansion throughout the world. He describes, for example, new thinking about how centres of agriculture sprang up among disparate foraging societies at roughly the same time. He tells why most of us can claim Julius Caesar and Confucius among our forebears. He pinpoints why the ways in which the story of the Jewish people jibes with, and diverges from, biblical accounts. And using very recent genetic findings, he explodes the myth that human races are a biological reality.

The nation-state of Trinidad and Tobago offers a unique nation-space, as Homi K Bhabha would say, for the study of the forces and ideologies of nationalism. This book reveals how this ethnically diverse nation, independent for less than forty years, has provided fertile ground for the creative tension between the imagination of the writer and the official discourse on nationalism. Harney argues that this discourse has in turn been embedded in a struggle that propelled the nation's story. He explores the influences on the sense of national identity caused by migration and the ethnicization of migrant communities in the cities. Adding to the comparative tone of much of this book, models of nationalism and ethnicity, often based on other societies, are tested against the imaginings of Trinidad by such essayists as VS Naipaul, CLR James, Willi Chen, Valerie Belgrave and Earl Lovelace. Using the wealth of imaginative literature produced by Trinidadians at home and abroad over the last forty years, together with European-based scholarship on theories of nationalism, this book provides a fascinating understanding of the forging of a national identity.

Commentary on Tirukkural, ancient Tamil classic verse by Tiruvalluvar; includes text with English translation.

An introduction to jiu-jitsu from one of its most dominant stars Thanks to the dominance of its practitioners at Ultimate Fighting Championships and other mixed martial arts tournaments, jiu-jitsu has become one of the most popular forms of martial arts in the United States. This fighting technique features ground fighting and submission moves that bewilder even the most ferocious opponents. In Jiu-Jitsu Unleashed, expert Eddie Bravo teaches you the moves that he used to defeat legendary Royler Gracie--a member of the reigning family of jiu-jitsu--the victory that made him one of the sport's most feared competitors. Jiu-Jitsu Unleashed features: Detailed instruction on stance, kicks, punches, takedowns, and submissions Step-by-step photos of basic and advanced moves modeled by "Fear Factor" host and former "NewsRadio" star Joe Rogan Various theories and strategies behind training and competing

A force reflecting hand controller based upon a six degree of freedom fully parallel mechanism, often termed a Stewart Platform, has been designed, constructed, and tested as an integrated system with a slave robot manipulator test bed. A force reflecting hand controller comprises a kinesthetic device capable of transmitting position and orientation commands to a slave robot manipulator while simultaneously representing the environmental interaction forces of the slave manipulator back to the operator through actuators driving the hand controller mechanism. The Stewart Platform was chosen as a novel approach to improve force reflecting teleoperation because of its inherently high ratio of load generation capability to system mass content and the correspondingly high dynamic bandwidth. An additional novelty of the program was to implement closed loop force and torque control about the hand controller mechanism by equipping the handgrip with a six degree of freedom force and torque measuring cell. The mechanical, electrical, computer, and control systems are discussed and system tests are presented. Bryfogle, Mark D. Unspecified Center CONTROL SYSTEMS DESIGN; CONTROLLERS; END EFFECTORS; MANIPULATORS; TELEOPERATORS; TELEROBOTICS; DEGREES OF FREEDOM; FEEDBACK CONTROL; ROBOT CONTROL; TORQUE SENSORS (ROBOTICS)...

In a future world that has been decimated by a sentient glacier and corrupt nanotechnology, a film archivist, a former mercenary and a virtuoso dishwasher are manipulated by a man who is overseeing the construction of a Manhattan replica in Puget Sound. By the author of Misconception. Original.

In this riveting biography of Elizabeth Seton critically acclaimed and bestselling author Joan Barthel tells the mesmerizing story of a woman whose life featured wealth and poverty, passion and sorrow, love and loss. Elizabeth was born into a prominent New York City family in 1774. Her father was the chief health officer for the Port of New York and she lived down the block from Alexander Hamilton. She danced at George Washington's sixty-fifth Birthday Ball wearing cream slippers, monogrammed. Catholicism was illegal in New York when she was born; Catholic priests seen in the city were arrested, sometimes hung. When Elizabeth and her wealthy husband Will sailed to Italy in a doomed attempt to cure his tuberculosis, she and her family were quarantined in a damp dungeon. And when Elizabeth later became a Catholic, she was so scorned that people talked of burning down her house. American Saint is the inspiring story of a brave woman who forged the way for the other women who followed and who made a name for herself in a world entirely ruled by men. Elizabeth resisted male clerical control of her religious order, as nuns are doing today, and the publication of her story could not be more timely. Maya Angelou has contributed the foreword.

Equations, Inequalities, and VICs (1 of the 8 books in Manhattan GMAT's Preparation Guide series) provides a highly organized and structured approach to the variety of questions in this quantitative content area. Students are presented with the various forms (and disguises) of algebra on the GMAT, and practice fundamental techniques and strategies to solve for unknown variables in any context. The book offers a unique balance between two competing emphases: test-taking strategies and in-depth content understanding. Practice problem sets build specific foundational skills in each topic and include the most advanced content that many other prep books ignore. Book also includes online access to 6 full-length Simulated Practice GMAT Exams at Manhattan GMAT's website.

Actress Caidence Harris is living her dreams: she's got a leading role on a hot new police drama, and although her new-found celebrity has changed her life, she's still able to lead a quiet life off the set, indulging her passion to be outdoors, surrounded by the beauty of nature. There is one dream?one passion?she hasn't fulfilled just yet, but that doesn't seem to be possible. Robyn Ward is a natural beauty, and a magnetic, talented actress on the fast track to stardom. Unfortunately for Caid, she already has a partner on that track, an athlete who gleams as brightly on the courts as he does on the red carpet. Soon Caid sees that all is not as it appears, but can she take a chance and risk her heart when the outcome is so uncertain? It's a role for which there's no script, and no rehearsal...

The international community is at a critical threshold in space policy. Science has advanced to a point where weapons and technologies that were once the exclusive domain of science fiction have become reality and new powers such as China threaten to unseat the United States as the global leader in space. The presence of these new powers creates new issues for the international community, all of which will need to be addressed in the decades to come. Militarization of Space provides a history of space exploration and militarization, analyzing past and current laws governing space and addressing future expected developments in the field. Case studies in this new volume include the United States, Russia, the European Space Agency, China, and some of the emerging players, including Japan, North Korea, South Korea, India, Pakistan, and Iran. An index, bibliography, and tables and graphs round out this insightful and timely resource.
