~~User Guide for the Cisco Unity Connection Phone Interface ...~~

Cisco Unity Connection allows licensed users to use a third-party IMAP client to access voice messages from their desktop machines. Currently, it is possible only to play voice messages with the IMAP client: there are no replies or forwarding capabilities. Passwords are not synchronized between IMAP clients and the Cisco PCA.

~~Cisco Unity Connection Voicemail User Guide~~

Connection user: Connection plays the message number, time stamp, and name and/or extension of the user who left the message.
Unidentified caller: Connection plays the message number and time stamp. Connection may also play the phone number of the caller, if

the number is available and if the system is set up to do so.

~~User Guide for the Cisco Unity Connection Messaging ...~~

As a Cisco Unity Connection user, you can send and manage messages by using a phone and by using the Cisco Unity Inbox web tool; you may also be able to manage voice messages in your e-mail program. The Cisco Unity Assistant web tool lets you personalize your Connection phone settings.

~~Documentation Guide for Cisco Unity Connection Release 7.x~~

Your first step in using Cisco Unity Connection is to enroll as a user, which you do by phone. Typically, Connection is set up so that you hear the first-time enrollment conversation when you call the system for the first time. The first-time enrollment conversation is a set of prerecorded prompts that guide you as you do the following tasks:

Adding users with the Bulk Administration Tool (BAT) in Cisco
Unity Connection is similar to using BAT in CUCM. There are
three basic tasks that need to be done to import users using BAT in
Cisco Unity Connection. Select and export the comma separated
value (CSV) file to your workstation. Add the users to the
