Designed for use in undergraduate or graduate courses in cost accounting. This edition emphasizes adding value to business, creating value, the value chain, and customer focus. New chapters on quality management and performance evaluation use nonfinancial performance measures, and a new chapter on activity-based management emphasizes strategic and behavioural implications. The book also contains new material on target costing, theory of constraints, and pricing. Learning aids include short cases and critical analysis questions.

The emphasis of Managerial Accounting, 8e is on teaching students to use accounting information to best manage an organization. In a practice Hilton pioneered in the first edition, each chapter is written around a realistic business or focus company that guides the reader through the topics of that chapter.

## Get Free Cost Accounting Creating Value For Management Fifth Edition By Michael Maher

Known for balanced examples of Service, Retail, Nonprofit and Manufacturing companies, Hilton offers a clear, engaging writing style that has been praised by instructors and students alike. As in previous editions, there is significant coverage of contemporary topics such as activity-based costing, target costing, the value chain, customer profitability analysis, and throughput costing while also including traditional topics such as job-order costing, budgeting and performance evaluation.

Revised edition of the authors's Managerial accounting, 2014.

The emphasis of MANAGERIAL ACCOUNTING, 6e is on teaching students to use accounting information to best manage an organization. In a practice Hilton pioneered in the first edition, each chapter is written around a realistic business or focus company that guides the reader through the topics of that chapter. Known for balanced examples of Service, Retail, Nonprofit and Manufacturing companies, Hilton offers a clear, engaging writing style that has been praised by instructors and students alike. As in previous editions, there is significant coverage of contemporary topics such as activity-based costing, target costing, the value chain, customer profitability analysis, and throughput costing while also including traditional topics such as job-order costing, budgeting and performance evaluation.
