The Indian Space Research Organisation (ISRO) is the space agency of the Government of India and has its headquarters in the city of Bengaluru. Its vision is to "harness space technology for national development while pursuing space science research & planetary exploration". The eligible candidates will be recruited by ISRO for the post of Scientist / Engineer in the field of Electronics & Communication (ECE). It is true that there are a lot of dedicated people working at this organisation. The kind of culture that exists in ISRO pushes it's employees into a perpetual competition with each other. If you want to work with ISRO there is a great opportunity to be part of ISRO as a Scientist / Engineer, and being a part of ISRO is pride within itself.

It is for all those medical professionals who are involved in the process of teaching. Although the general principles of teaching remain the same worldwide, this book is tailored to meet the demands of "Faculty Development" in a Medical Institution. This is a text in demand from not only medical teachers, but also from all the faculty of paramedical and allied health courses. "Covers three broad aspects of teaching and learning, viz., (i) Technology in and of education, (ii) Management of education and (iii) Educational research. " Beautifully illustrated educational science applies to medical teachers as well as members of healthcare team and also all those who are involved in the art of teaching. " Authored by experts who have vast experience in medical education at both national and international levels. Their vision, thought process and knowledge get reflected in their writings. " A "must read" book for every young faculty making his/her entry in the educational field as a medical teacher before embarking on educational activities.

The second edition of this book is thoroughly revised as per guidelines of National Medical Commission in accordance with the competency-based curriculum of Biochemistry. The questions not only test the knowledge but also incorporate the clinical/applied aspects of biochemistry which are so important to help the students to think out of the box. " Uniquely presented in question-answer format covering all categories of questions that are expected in a university exam, in concise manner for rapid revision. " Covers questions which can be asked in different way (different questions by same answers), this helps students to write answers for these questions in exams. " Answers presented in bullet points supported with tables, boxes, and figures, helps students to frame answers to questions and replicate the same in exams. " Complex/Key information is summarized in tables helps in quick revision during exams and also breaks monotony text. " Applied aspects provided at appropriate places in colored boxes, adds more clarity to the answer provided. " Recapitulation of points to ponder at the end of text for quick revision. " Prepares students for both theory and viva voce. " Reorganized topics in the same order as presented in new curriculum. " Insight into the biochemistry CBME curriculum with respect to Attitude, Ethics and Communication (AETCOM), Early Clinical Exposure (ECE), and self-directed learning in order to help in the making of the Indian Medical Graduate. " Ensured coverage of all competency codes integrated within the text as per new competency-based undergraduate curriculum. " Inclusion of 250 multiple-choice questions, and 500 short questions and viva voce for self-assessment of the topics studied. " Insertion of clinical cases along with answers to clinical cases at the end of the book to help understand the biochemical basis of disease and its management.

"This research publication accommodates in-depth studies that elucidate both the prospects and problems of learning assessment in higher education"--Provided by publisher.

Now in its second edition, Electronic Communications Systems provides electronics technologists with an extraordinarily complete, accurate, and timely introduction to all of the state-of-the-art technologies used in the communications field today. Comprehensive coverage includes traditional analog systems, as well as modern digital techniques. Extensive discussion of today's modern wireless systems - including cellular, radio, paging systems, and wireless data networks - is also included. In addition, sections on data communication and the internet, high-definition television, and fiber optics have been updated in this edition to enable readers to keep pace with the latest technological advancements. A block-diagram approach is emphasized throughout the book, with circuits included when helpful to lead readers to an understanding of fundamental principles. Instructive, step-by-step examples using MultiSIM[®], in addition to those that use actual equipment and current manufacturer's specifications, are also included. Knowledge of basic algebra and trigonometry is assumed, yet no calculus is required.
