With the development of societies fossil energy is no longer the only energy resource, and increasing attention had been paid to alternative energy. Biomass is considered to be one of the alternatives due to efficiency and low cost. This book presents biomass pyrolysis behavior for three main components: Cellulose, Hemicellulose and Lignin, and discusses the influence of mineral salts , zeolite catalysts and metal oxide on their pyrolysis.

Richard Koch has made over £100 million from spotting 'Star' businesses. In his new book, he shares the secrets of his success - and shows how you too can identify and enrich yourself from 'Stars'. Star businesses are ventures operating in a high-growth sector - and are the leaders in their niche of the market. Stars are rare. But with the help of this book and a little patience, you can find one, or create one yourself. THE STAR PRINCIPLE is a vital book for any budding entrepreneur or investor (of grand or modest means). It is also invaluable for any ambitious employee who realises the benefits of working for a Star venture - real responsibility, fast personal development, better pay, great bonuses and valuable share options. Whoever your are, identifying and investing in Stars will make your life much sweeter and richer in every way.

Direct injection enables precise control of the fuel/air mixture so that engines can be tuned for improved power and fuel economy, but ongoing research challenges remain in improving the technology for commercial applications. As fuel prices escalate DI engines are expected to gain in popularity for automotive applications. This important book, in two volumes, reviews the science and technology of different types of DI combustion engines and their fuels. Volume 1 deals with direct injection gasoline and CNG engines, including history and essential principles, approaches to improved fuel economy, design, optimisation, optical techniques and their applications. Reviews key technologies for enhancing direct injection (DI) gasoline engines Examines approaches to improved fuel economy and lower emissions Discusses DI compressed natural gas (CNG) engines and biofuels
