This book presents the concept of value as the central component to success and longevity of the global ICT industry player, Huawei. It provides examples of how Huawei focuses on customers to pursue sustainable and profitable growth rather than focusing on capital market valuation, which is a familiar scenario among Western companies. It is the business departments that are the creators of value for Huawei, whereas the finance department is tasked to provide support and services to those business departments and oversee their operations during the value creation process. The book illustrates how Huawei Finance sets rules, allocates resources, and builds centers of expertise all over the world to address future uncertainties. More than a decade ago Huawei dedicated seven years to implement the Integrated Financial Services (IFS) Transformation Program with the help of IBM consultants. This book also draws on the leading concepts and successful experience of the IFS Transformation Program. Huawei Finance adopts three types of centralized vertical management from the top down: treasury, accounting, and auditing. It does not transfer such central authority down to lower levels, but rather delegates all other authority to business organizations across all levels. This management model represents the focus of this book. Built on Value provides an overview of Huawei's finance management and will help academic researchers in Business/Management, as well as practitioners in industry, gain an accurate and in-depth understanding of Huawei as a company. Weiwei Huang is a professor at the School of Business, Renmin University, and previously headed the Business School's Department of Management Science and

Engineering. He received his Master's Degree in Economics from the Industrial Economics Department of Renmin University of China. He is also a visiting scholar at the Desautels Faculty of Management at McGill University, the Ivey Business School at the University of Western Ontario, and the University at Buffalo School of Management.

A possible life-saving reference to keep around the house or in the car, DK's First Aid Manual looks at more than 100 different conditions, from splinters and sprained ankles to strokes and unconsciousness, and shows exactly what to do with step-by-step photographic sequences. Every condition is clearly explained, outlining causes, symptoms, and signs, and action plans. The updated design makes the instructions easier to follow, whether you need information on emergency first aid, first aid for babies and children, or tips on resuscitation. This ACEP First Aid Manual is an invaluable resource to keep you and your loved ones safe and healthy.

The internet may be a utopia for free expression, but it also harbours nihilistic groups and individuals spreading bizarre creeds, unhindered by the risk-averse gatekeepers of the mass media -- and not all are as harmless as the Virtual Church of the Blind Chihuahua or Sexastrianism. With few entry barriers, ready anonymity and no centralised control, the internet offers wired extremists unprecedented access to a potential global audience of billions. Technology allows us to select the information we wish to receive -- so those of a fanatical bent can filter out moderating voices and ignore countervailing arguments, retreating into a virtual world of their own design that reaffirms their views. In *The Devil's Long Tail*, Stevens and O'Hara argue that we misunderstand online extremism if we think intervention is the best way to counter it. Policies designed to disrupt radical networks fail because they ignore the factors that push people to the margins. Extremists are driven less by ideas than by the benefits of participating in a tightly-knit, self-defined, group. Rather, extreme ideas should be left to sink or swim in the internet's marketplace of ideas. The internet and the web are valuable creations of a free society. Censoring them impoverishes us all while leaving the radical impulse intact.

The First Aid Manual is the UK's only fully authorised first aid guide, endorsed by St John Ambulance, St Andrew's First Aid and the British Red Cross and packed with step-by-step first aid advice. Used as the official training manual for the UK's leading first aid organisations' courses, the bestselling First Aid Manual covers all aspects of first aid, from emergency first aid and first aid for babies and children, to the latest guidelines on resuscitation, helping a drowning casualty, and snake bites. Find out how to treat over 100 different conditions from splinters and sprained ankles to strokes and unresponsiveness and how to use essential equipment including a defibrillator. Step-by-step photography,

all shot in-situ to reflect real-life issues, shows you what to do in any situation. The ideal first aid book for you and your family, keep the First Aid Manual handy; it could be a life-saver. (Previous edition ISBN 9781409342007)

In response to a tasking from the Air Force chief of staff, the Air Force Research Institute conducted a review of how the service organizes, educates/trains, and equips its cyber workforce. The resulting findings were used to develop recommendations for how the Air Force should recruit, educate, train, and develop cyber operators from the time they are potential accessions until they become senior leaders in the enlisted and officer corps. This study's discoveries, analyses, and recommendations are aimed at guiding staff officers and senior leaders alike as they consider how to develop a future cyber workforce that supports both Air Force and US Cyber Command missions across the range of military operations.

Are risk-takers born or made? Why are some more willing to go out on a limb (so to speak) than others? How do we weigh the value of opportunities large or small that may have the potential to change the course of our lives? These are just a few of the questions that author Kayt Sukel tackles, applying the latest research in neuroscience and psychology to compelling real-world situations. Building on a portfolio of work that has appeared in such publications as *Scientific American*, *Atlantic Monthly*, *The Washington Post*, and more, Sukel offers an in-depth look at risk-taking and its role in the many facets of life that resonates on a personal level. Smart, progressive, and truly enlightening, *The Art of Risk* blends riveting case studies and hard-hitting science to explore risk-taking and how it impacts decision-making in work, play, love, and life, providing insight in understanding individual behavior and furthering personal success.

This book constitutes the proceedings of the 11th International Conference on Network and System Security, NSS 2017, held in Helsinki, Finland, in August 2017. The 24 revised full papers presented in this book were carefully reviewed and selected from 83 initial submissions. The papers are organized in topical sections on Cloud and IoT Security; Network Security; Platform and Hardware Security; Crypto and Others; and Authentication and Key Management. This volume also contains 35 contributions of the following workshops: Security Measurements of Cyber Networks (SMCN-2017); Security in Big Data (SECBD-2017); 5G Security and Machine Learning (IW5GS-2017); of the Internet of Everything (SECIOE-2017).

This book reviews the history of the United States-Liberia relations from the early 1820s to 2015, with particular attention paid to the role of the US armed forces. Contrary to most literature on the genesis

and development of Liberia, this book demonstrates how US military power has been the primary influence shaping Liberia's history. This includes the role played by the US military in the founding of Liberia, the protection of the country during the European formal colonial era, multiple covert operations in securing US-friendly administrations in Liberia, and direct military interventions when necessary to secure American interests in the region.

This book constitutes the refereed post-conference proceedings of the 12th EAI International Conference on Security and Privacy in Communications Networks, SecureComm 2016, held in Guangzhou, China, in October 2016. The 32 revised full papers and 18 poster papers were carefully reviewed and selected from 137 submissions. The papers are organized thematically starting with mobile and network security, followed by applied cryptography, ATCS workshops, web security and privacy, system security, hardware security and finally the poster session.

Predicts that China will supplant the west as an economic superpower, and discusses China's anti-globalization stance and dubious capacity for maintaining world peace.
