Introduction to Computer Security
- Information Security Lesson #1
of 12 *Data Protection and Privacy*
Information Security And Privacy
A

Information privacy, or data privacy is the relationship between the collection and dissemination of data and the public expectation of privacy. The safeguarding of personal data is the objective i.e. data about individuals such as contact information, health, financial, and family information; these individuals could be your employees, your customers and other stakeholders.

Privacy relates to any rights you have to control your personal information. Security refers to how your personal information is protected. Some people regard privacy and security as pretty much the same thing, but they aren't the same, and knowing how they differ may help you to protect yourself in an increasingly connected world.

Privacy vs. security: what's the difference?

Having an on-demand information security and privacy awareness program (or two) in a business has many benefits, including:
Establishes organization policy

Get Free Information Security And Privacy A and program —It is a best practice for an organization to have an information technology security awareness program.

The Benefits of Information Security and Privacy Awareness

...

Privacy is a connotation of larger organizations, which requires a detailed understanding of the law that assists citizens against the law of nations, while security is a practice of the protection of information that provides care for the declared strategic asset. In reason with that, we can see there will be practices of information security that apply to the exercise of privacy, and privacy concepts similar to the principles in information security.

The difference between privacy and security can be a bit confusing as security and privacy are two interrelated terms. In information technology world, providing security means providing three security services: confidentiality, integrity, and availability. Confidentiality or privacy in one of them. So, privacy is just one part of security.
