IAPT—International Association for Plant Taxonomy

International Code of Botanical Nomenclature (Saint Louis Code), Electronic version ,CHAPTER IV. EFFECTIVE AND VALID PUBLICATION. SECTION 3. AUTHOR CITATIONS. Article 46, 46.1.

International Code of Botanical Nomenclature

Principles of International Code of Botanical Nomenclature, (ICBN): 1. Botanical nomenclature is independent of zoological nomenclature. The code applies equally to names of taxonomic groups treated as plants whether or not these groups were originally so treated (Plants do not include Bacteria).

International Code of Botanical Nomenclature (ICBN) I Taxonomy

Botanical nomenclature is the formal, scientific naming of plants. It is related to, but distinct from taxonomy. Plant taxonomy is concerned with grouping and classifying plants; botanical nomenclature then provides names for the results of this process. The starting point for modern botanical nomenclature is Linnaeus' Species Plantarum of 1753. Botanical nomenclature is governed by the International Code of Nomenclature for algae, fungi, and plants, which replaces the International Code of Bota

Botanical nomenclature—Wikipedia

In July 1975, twelfth meeting was held at Leningrad, USSR. Based on the resolutions of these meetings, the existing system of International Code of Botanical Nomenclature (ICBN) was adapted from 1978. The IBC meets every 5 to 6 years to decide any additions or changes in the naming and numbering of plants.

International Code of Botanical Nomenclature (ICBN)---

The word would be useful in general discourse about "wild" and "cultivated" plants and would clarify the respective scope, terminology and concepts of the International Code of Botanical...

(PDF) The International Code of Botanical Nomenclature---

The International Code of Botanical Nomenclature establishes the rules which govern the scientific naming of both wild and cultivated plants. The cultivated plants are all those plants which mankind has developed and selected to grow, cultivate and use and the origin of which is chiefly due to intentional human activity.

The International Code of Nomenclature for Cultivated---

International Code of Botanical Nomenclature A set of rules for the formal naming of plants, accepted by botanists, in which the underlying principle is the allocation of a single, unambiguous name to each taxon. The Code comprises a set of 6 Principles to guide those who are selecting a new name, 75 Articles, and a number of Recommendations.

International Code Of Botanical Nomenclature---

International Code of Botanical Nomenclature, commonly abbreviated as ICBN. In Melbourne, reflecting the view, particularly In Melbourne, reflecting the view, particularly amongst mycologists, that the word "Botanical" was misleading and could imply that the Code covered only green plants and
