Introductory topics in computer security. The goal is to expose students to a broad range of security challenges facing us today. The course examines a wide range of topics in operating systems, software engineering, and network and communications security.

Comp535: Introduction to Computer Security

90% of security safeguards rely on the computer user (‘‘YOU’’) to adhere to good computing practices Example: The lock on the door is the 10%. You remembering to lock the lock, checking to see if the door is closed, ensuring others do not prop the door open, keeping control of the keys, etc. is the 90%.
