I have a man-lift with a 2.5 Ford industrial engine, 2000 model, dual fuel, gas or propane. I bought it at auction, it was running terrible, just thought it needed a tune up. Was I ever wrong! I have replaced the cam sensor, plugs (3 times), plug wires, coils, timing belt, did a valve job with new lifters, guides, and valves.

Is history driven more by principle or interest? Are ideas of historical progress obsolete? Is it unforgivable to change one's mind or political allegiance? Did the eighteenth century really exchange the civilizing force of commercial advantage for political conflict? In this new account of liberal thought from its roots in seventeenth-century English thinking to the end of the eighteenth century, Annabel Patterson tackles these important historiographical questions. She rescues the term "whig" from the low regard attached to it; denies the primacy of self-interest in the political struggles of Georgian England; and argues that while Whigs may have strayed from liberal principles on occasion (nobody's perfect), nevertheless many were true progressives. In a series of case studies, mainly from the reign of George III, Patterson examines or re-examines the careers of such

prominent individuals as John Almon, Edmund Burke, Sir Joshua Reynolds, Thomas Erskine, and, at the end of the century, William Wordsworth. She also addresses a host of secondary characters, reshaping our thinking about both well-known and lesser figures of the time. Tracking a coherent, sustained, and adaptable liberalism throughout the eighteenth century, Patterson overturns common assumptions of political, cultural, and art historians. The author delivers fresh insights into the careers of those who called themselves Whigs, their place in British political thought, and the crucial ramifications of this thinking in the American political arena. Book jacket.

Primary experience, gained through the senses, is our most basic way of understanding reality and learning for ourselves. Our culture, however, favors the indirect knowledge gained from secondary experience, in which information is selected, modified, packaged, and presented to us by others. In this controversial book, Edward S. Reed warns that secondhand experience has become so dominant in our technological workplaces, schools, and even homes that primary experience is endangered. Reed calls for a better balance between firsthand and secondhand experience, particularly in our social institutions. He contends that without opportunities to learn directly, we become less likely to think and feel for ourselves. Since the scientific revolution of the seventeenth century, Western epistemological tradition has rejected primary experience in favor of the abstractions of secondhand experience. Building on James Gibson's concept of ecological psychology, Reed offers a spirited defense of the reality and significance of ordinary experience against both modernist and postmodernist critics. He expands on the radical critiques of work, education, and art begun by William Morris and John Dewey, offering an alternative vision of meaningful learning that places greater emphasis on unmediated experience, and he outlines the psychological, cultural, and intellectual conditions that will be needed to foster that crucial change.

In an exhibition shown from 20 January to 27 May 1996, the Kunsthalle Tübingen presented a thoughtfully prepared selection of many of Renoir's most important paintings from his more than five decades of creative life. The first comprehensive, scholarly retrospective ever devoted to the artist in Germany and presented only in Tübingen, the exhibition offered a view of a significant cross-section of the painter's complete oeuvre. Each of the works exhibited is illustrated in this volume in a full-page plate. Paintings representing the full spectrum of Renoir's themes and including some of the most noteworthy works in major international collections and museums in such cities as Washington, D.C., New York, Philadelphia, Sao Paulo, Stockholm, Madrid, London, Paris, St. Petersburg, Zurich, Tokyo, Hiroshima and Berlin - all were provided on loan for the exhibition - provide enlightening insights into the work of this artistic genius.

Two mismatched teenage girls must find their way back home to New Jersey after being zapped into the pages of a fantasy novel.
