String Trimmer and Blower Service Manual for more than 35 popular brands and 500 models

Promoting British Values in the Early Years explores what is meant by British values and how these can be promoted in the Early Years Foundation Stage (EYFS). The book encourages practitioners to reflect on their own attitudes and beliefs and highlights the importance of parents, children and practitioners working together to create inclusive communities. It also examines how and why it is important to foster a sense of belonging, provide inspiration and promote positive attitudes in order to improve outcomes for children. With case studies and useful links to the EYFS, this book will help readers to nurture children's sense of identity and support them in becoming responsible citizens, celebrating diversity and valuing different cultures, customs and practices. It offers practical guidance on how to develop children's understanding of liberty and democracy, and a mutual tolerance and respect for different faiths and beliefs. This book will be of interest to Early Years practitioners and primary school teachers, as well as undergraduates studying relevant Early Years and Childhood Studies courses. It is also relevant to parents of young children.

Orphaned and homeless in New York City at 14 years old in 2009, Carlo Juliano lived on the streets to survive until a local crime family boss, Johnny Toracio, gave him a job, his own place to live, and mentored him into a life as a gangster. For the next few years, Carlo flourished on the streets of New York befriending leaders of construction scams, art theft rings, drug cartels, biker gangs, extortion rackets, gambling, and cybercrime. In 2015, a series of events ignited a treacherous power struggle for control of New York City's underworld.

Written as a sequel to The Agricultural Tractor 1855-1950 by R. B. Gray and Farm Tractors 1950-1975 by Lester Larson, each chapter lists most of the new tractors introduced for that year, a summary of the specifications for the models, and information about the companies manufacturing the tractors.

Contains information on all of the company's tractors and crawlers, starting with the first IH tractor built in 1905 through to the last International tractors built before the 1985 merger with Case. Col. photos.

Written by dedicated educators who are also real-life engineers with a passion for the discipline, Engineering Fluid Mechanics, 11th Edition, carefully guides students from fundamental fluid mechanics concepts to real-world engineering applications. The Eleventh Edition and its accompanying resources deliver a powerful learning solution that helps students develop a strong conceptual understanding of fluid flow phenomena through clear physical descriptions, relevant and engaging photographs, illustrations, and a variety of fully worked example problems. Including a wealth of problems-- including open-ended design problems and computer-oriented problems--this text offers ample opportunities for students to apply fluid mechanics principles as they build knowledge in a logical way and enjoy the journey of discovery.
