There are over 2000 registered historic buildings in Shanghai, with hundreds more waiting to be added. Most are pre-War structures and are either Western buildings, or Chinese-style buildings with a distinct Western influence. These include villas, offices, apartment buildings and shikumen (a house of both wood and brick). Structures were selected for this book because of the interesting stories behind them or because they were related to a topical news event.

Pell's equation is part of a central area of algebraic number theory that treats quadratic forms and the structure of the rings of integers in algebraic number fields. It is an ideal topic to lead college students, as well as some talented and motivated high school students, to a better appreciation of the power of mathematical technique. Even at the specific level of quadratic diophantine equations, there are unsolved problems, and the higher degree analogues of Pell's equation, particularly beyond the third, do not appear to have been well studied. In this focused exercise book, the topic is motivated and developed through sections of exercises which will allow the readers to recreate known theory and provide a focus for their algebraic practice. There are several explorations that encourage the reader to embark on their own research. A high school background in mathematics is all that is needed to get into this book, and teachers and others interested in mathematics who do not have (or have forgotten) a background in advanced mathematics may find that it is a suitable vehicle for keeping up an independent interest in the subject.

The first major book on Japanese textile artist Itchiku Kubota, published to accompany a touring exhibition.

Zane Beaumont's life changed the day he walked into Lou's Burger Joint and saw Lucky Morgan for the first time. He wasn't sure if it was her smile, or her chocolate brown eyes that captured his heart, but he knew that he would do anything to make sure he got to know her better. We all know the story of how Lucky fell in love with Zane, now it's time to see how Zane fell for Lucky. Before Lucky tells the story of how one handsome, but broken man found love for the first time.

More than twenty years have passed since Walter Auffenberg's monumental *The Behavioral Ecology of the Komodo Monitor*. In the intervening years the populations of Komodo dragons—native only to a handful of islands in southeast Indonesia—have dwindled, sparking intensive conservation efforts. During the last two decades new information about these formidable predators has emerged, and the most important findings are clearly presented here. A memoir from Walter Auffenberg and his son Kurt is followed by the latest information on Komodo dragon biology, ecology, population distribution, and behavior. The second part of the book is dedicated to step-by-step management and conservation techniques, both for wild and captive dragons. This successful model is a useful template for the conservation of other endangered species as well, for, as Kurt and Walter Auffenberg note, “The species may well indeed survive in the wild for generations to come while countless other organisms are lost.”

Screenwriter and noted film critic C. Robert Cargill continues the story begun in his acclaimed debut *Dreams and Shadows* in this bold and brilliantly crafted tale involving fairies and humans, magic and monsters—a vivid phantasmagoria that combines the imaginative wonders of Neil Gaiman, the visual inventiveness of Guillermo Del Toro, and the shocking miasma of William S. Burroughs. Six months have passed since the wizard Colby lost his best friend to an army of fairies from the Limestone Kingdom, a realm of mystery and darkness beyond our own. But in vanquishing these creatures and banning them from Austin, Colby sacrificed the anonymity that protected him. Now, word of his deeds has spread, and powerful enemies from the past—including one Colby considered a friend—have resurfaced to exact their revenge. As darkness gathers around the city, Colby sifts through his memories desperate to find answers that might save him. With time running out, and few of his old allies and enemies willing to help, he is forced to turn for aid to forces even darker than those he once battled. Following such masters as Lev Grossman, Erin Morgenstern, Richard Kadrey, and Kim Harrison, C. Robert Cargill takes us deeper into an extraordinary universe of darkness and wonder, despair and hope to reveal the magic and monsters around us . . . and inside us.
