LaTeX is a document preparation system used for the communication and publication of scientific documents. LaTeX is free software and is distributed under the LaTeX Project Public License.

LaTeX Documentation

This document is an unofficial reference manual for LATEX, a document preparation system, version of October 2018. This manual was originally translated from LATEX.HLP v1.0a in the VMS Help Library. The pre-translation version was written by George D. Greenwade of Sam Houston State University. The L ATEX 2.09 version was written by Stephen Gilmore. The LTEX2e version

LATEX2e: An unofficial reference manual

any change in the output. Finally, the input `\LaTeX` comes out in the output as LATEX. Thus our source is a mixture of text to be typeset and a couple of LATEX commands `\emph` and `\LaTeX`. The `?rst` command changes the input text in a certain way and the second one generates new text. Now call up the `?le` again and add one more sentence given below.

LATEX Tutorials

LATEX (pronounced lay-tek) is a document preparation system for producing professional-looking documents, it is not a word processor. It is particularly suited to producing long, structured documents, and is very good at type- setting equations. It is available as free software for most operating systems.

LATEX for Beginners Workbook Edition 5, March 2014 ...

LaTeX is a macro system built on top of TeX that aims to simplify its use and automate many common formatting tasks. It is the de-facto standard for academic journals and books, and provides some of the best typography free software has to offer. This book is organized into different parts:

LaTeX - Wikibooks, open books for an open world

LATEX is a typesetting system that is very suitable for producing scien- ti?c and mathematical documents of high typographical quality. It is also suitable for producing all sorts of other documents, from simple letters to completebooks. LATEXusesTEXasitsformattingengine.

PGF and TikZ, Manual for Version 3.0.1 - CVS

PGF and TikZ, Manual for Version 3.0.1 - CVS

LaTeX has the convention that some commands have a * form that is related to the form without a *, such as `\chapter` and `\chapter*`. The exact difference in behavior varies from command to command. This manual describes all accepted options and *-forms for the commands it covers (barring unintentional omissions, a.k.a. bugs).
