Manual handling is involved in almost every activity in the workplace. This book is primarily about the manual handling related questions I have been asked over the years and the responses I have provided throughout Australia. I have found that this question and answer style of writing is well accepted in the workplace particularly amongst employees and middle management. Employees and their managers can carry this very practical book around with them and have access to solutions to questions they may be asked throughout their day. Whilst the advice of an OHS expert should always be sought due to the merits of each situation, this book is a good guide in basic manual handling risk management.

This third edition provides 2900 multiple choice questions on human anatomy and physiology, and some biophysical science, separated into 20 chapters and 68 categories. In addition, there are 64 essay topics. The answer to each question is accompanied by an explanation. Each chapter has an introduction to set the scene for the questions to come. However, not all possible information is provided within these Introductions, so an Anatomy and Physiology textbook is an indispensable aid to understanding the answers. The textbook offers a more holistic approach to the subjects of anatomy and physiology by also including biomechanics, biophysics and biochemistry. The questions have been used in end-of-semester examinations for undergraduate anatomy and physiology courses, and as such, reflect the focus of these particular courses and are pitched at this level to challenge students that are beginning their training in anatomy and physiology. The question and answer combinations are intended for use by teachers, to select questions for their next examinations, and by students, when studying for an upcoming test. Students enrolled in the courses for which these questions were written include nursing, midwifery, paramedic, physiotherapy, occupational therapy, nutrition and dietetics, health sciences, exercise science, and students taking an anatomy and physiology course as an elective.
