To view the material requirements plan, go

to the Inventory planning tab. The tab

shows a table that contains the material

requirements plan, production plan, and

(optionally) purchase plan.

Material Requirements Planning User Guide

In addition to planning the material

requirements of your supply chain, you can

plan the requirements for your distribution

network. This includes all warehouses,

distribution centers, and any location that

ships products. You can use these

distribution requirements plans (DRPs) as

input for your material plans.

Deltek Costpoint® 7.1

MRP (material requirements planning) is a system that automates the production, inventory and scheduling processes for manufacturing companies. MRP systems enable production planners to match supply and demand efficiently by forecasting the amount and type of product needed for future projects while also tracking the number of materials needed for current ones.

What is Material Requirements Planning (MRP)? | Definition ...

Material Requirement Planning (MRP) is a system used for planning, production & inventory control. It integrates data of production schedules with inventory and BOM to calculate purchasing and shipping
