Notes from a Blue Bike is part memoir, part travelogue, part practical guide, where I journey through my past and essentially ask the question, "Is it possible to live slowly in a fast-paced culture?" It's a lot of stories—stories from my time in places like Kosovo, Russia, Wales, and Turkey, where I've experienced the slow, rhythmic daily process of sucking the marrow out of line-drying my laundry and spending six hours with a neighbor.

A round-the-world bicycle tour with one of the most original artists of our day. Urban bicycling has become more popular than ever as recession-strapped, climate-conscious city dwellers reinvent basic transportation. In this wide-ranging memoir, artist/musician and co-founder of Talking Heads David Byrne--who has relied on a bike to get around New York City since the early 1980s--relates his adventures as he pedals through and engages with some of the world's major cities. From Buenos Aires to Berlin, he meets a range of people both famous and ordinary, shares his thoughts on art, fashion, music, globalization, and the ways that many places are becoming more bike-friendly. Bicycle Diaries is an adventure on two wheels conveyed with humor, curiosity, and humanity.

With a new Introduction to this touching homage to his mother, the author paints a portrait of growing up in a black neighborhood as the child of an interracial marriage. Although raised an Orthodox Jew in the South, McBride's mother abandoned her heritage, moved to Harlem, and married a black man.

As bicycle commuting grows in the United States, the profile of the white, middle-class cyclist has emerged. This stereotype evolves just as investments in cycling play an increasingly important role in neighborhood transformations. However, despite stereotypes, the cycling public is actually quite diverse, with the greatest share falling into the lowest income categories. Bicycle Justice and Urban Transformation demonstrates that for those with privilege, bicycling can be liberatory, a lifestyle choice, whereas for those surviving at the margins, cycling is not a choice, but an often oppressive necessity. Ignoring these "invisible" cyclists skews bicycle improvements towards those with choices. This book argues that it is vital to contextualize bicycling within a broader social justice framework if investments are to serve all street users equitably. "Bicycle justice" is an inclusionary social movement based on furthering material equity and the recognition that qualitative differences matter. This book illustrates equitable bicycle advocacy, policy and planning. In synthesizing the projects of critical cultural studies, transportation justice and planning, the book reveals the relevance of social justice to public and community-driven investments in cycling. This book will interest professionals, advocates, academics and students in the fields of transportation planning, urban planning, community development, urban geography, sociology and policy.
