Flashcards | Quizlet

POGIL® (Process Oriented Guided Inquiry Learning) is a student-centered instructional approach in which students work in small teams with the instructor acting only as a facilitator. The specially designed activities follow a learning cycle paradigm in which students are presented with data or information to interpret and guiding questions to lead them toward valid conclusions-essentially a ...

Oxidative phosphorylation is the term used for the attachment of free inorganic phosphate to a molecule. Identify the phases of cellular respiration that use substrate level phosphorylation and that use oxidative phosphorylation. Glycolysis and the Krebs cycle use substrate level phosphorylation, and oxidative phosphorylation uses oxidative phosphorylation.
