This report examines the application of plastics in European cars in the middle of the year 2000. It evaluates the changes in use and considers possible developments over the next decade. The use of plastics for specific components is examined, comparison is made between competitive materials and examples of commercial application are included. Estimates are presented for current plastics usage in European cars with forecasts to 2008.

This report provides detailed documentation on current trends and prospective developments in the use of thermoplastics and thermoplastic composites by the automotive industry.

Marketing is a universal activity that is widely applicable, regardless of the political, social or economic systems of a particular country. However, this doesn't mean that consumers in different parts of the world should be satisfied in the same way. The fifth edition of International Marketing has been written to enable managers and scholars to meet the international challenges they face every day. It provides the solid foundation required to understand the

complexities of marketing on a global scale. Fully updated, this book includes topical case studies, examples of contemporary marketing campaigns, the most relevant discussion topics and up-to-date theories, references and research findings. It is this combination of theory and practice that makes this textbook truly unique, presenting a fully rounded view of the topic rather than solely an anecdotal or descriptive one.
