Nearly 90 percent of UK residents between 16 and 75 already have smartphones, and customer authentication techniques should be implemented on them, according to the white paper. “Consumers face an increasingly complex authentication landscape, which can vary greatly depending on the communication channels they use,” states Frans Labuschagne, UK&I country manager at Entersekt.

The hope and hype about African digital entrepreneurship, contrasted with the reality on the ground in local ecosystems. In recent years, Africa has seen a digital entrepreneurship boom, with hundreds of millions of dollars poured into tech cities, entrepreneurship trainings, coworking spaces, innovation prizes, and investment funds. Politicians and technologists have offered Silicon Valley-influenced narratives of boundless opportunity and exponential growth, in which internet-enabled entrepreneurship allows Africa to “leapfrog” developmental stages to take a leading role in the digital revolution. This book contrasts these aspirations with empirical research about what is actually happening on the ground. The authors find that although the digital revolution has empowered local entrepreneurs, it does not untether local economies from the continent's structural legacies.

How did die become kick the bucket, underwear become unmentionables, and having an affair become hiking the Appalachian trail? Originally used to avoid blasphemy, honor taboos, and make nice, euphemisms have become embedded in the fabric of our language. Euphemania traces the origins of euphemisms from a tool of the church to a form of gentility to today's instrument of commercial, political, and postmodern doublespeak. As much social commentary as a book for word lovers, Euphemania is a lively and thought-provoking look at the power of words and our power over them.

Filled with infographics, visuals, and case studies—a vibrant, practical guide to creating a winning business model for any startup The Startup Equation leads you step by step through the decisions and data to find your perfect startup model. Technology has enabled a new age of entrepreneurship as entrepreneurs find digital tools that enable new ventures to exploit commercial opportunities around the world. This textbook provides students with expert guidance on using technology platforms to start new ventures. With an award-winning approach, the author guides readers through the process of a lean startup, taking a "digital first" approach to entrepreneurship. Students using the book will emerge with enhanced understanding of different digital business models, analytical skills for digital ventures, and the confidence to move from prototype to product. Online resources such as slides, a sample syllabus, and exercises encourage the classroom to become an interactive and dynamic space.

Jerry Mitchell returns in Arctic Gambit, an explosive military thriller by New York Times bestselling author Larry Bond Jerry Mitchell, now the commodore of submarine Development Squadron Five, is dismayed when USS Toledo is reported missing in Arctic waters, close to Russian territory. The vessel is captained by his former shipmate and close friend, Lenny Berg. Eager to investigate, Jerry convinces the Navy to redirect one of his squadron's boats to find out what happened. It turns out Toledo was sunk just outside of Russian territorial waters by a torpedo launched from a naval mine. Even more disturbing is the discovery that Russia is building a deadly weapon. Engineers have modified the STATUS-6, a strategic nuclear-propelled, nuclear armed torpedo that is already operational, into a stealthy first strike weapon: Drakon. This new tool would allow the Russians to launch a completely covert nuclear decapitation strike on the USA. The new Russian president has plans for Europe, and is more than willing to use nuclear blackmail-or an actual attack-to keep the Americans from interfering. To avoid a Russian war in Europe, and a nuclear catastrophe at home, Mitchell must find a way to destroy the Drakon launcher before it's too late.
