Ross Bentley. Race teams have discovered great benefits can be derived from "tuning" their driver to perform at his/her full potential. Thus, this book is for everyone who works with a driver: engineers, crew chiefs, team owners, mechanics, and the driver's parents. This unique book instructs the driver's support team how to prepare and communicate with the driver so the driver delivers the best performance in races, practice sessions, and off-track team functions. Written by veteran racer and driving coach Ross Bentley, this book helps the driver's support team devise effective approaches to "tuning" their driver. It will help them identify techniques that do and don't work with their specific driver. The result should be better communication and a driver who is "tuned" for success.

Alex Davies tells the dramatic, colorful story of the quest to develop driverless cars—and the fierce competition between Google, Uber, and other companies in a race to revolutionize our lives. The self-driving car has been one of the most vaunted technological breakthroughs of recent years. But early promises that these autonomous vehicles would soon be on the roads have proven premature. Alex Davies follows the twists and turns of this story from its origins to today. The story starts with the Defense Advanced Research Projects Agency (DARPA), which was charged with developing a land-based equivalent to the drone, a vehicle that could operate in war zones without risking human lives. DARPA issued a series of three "Grand Challenges" that attracted visionaries, many of them students and amateurs, who took the technology from Jetsons-style fantasy to near-reality. The young stars of the Challenges soon connected with Silicon Valley giants Google and Uber, intent on delivering a new way of driving to the civilian world. Soon the automakers joined the quest, some on

their own, others in partnership with the tech titans. But as road testing progressed, it became clear that the challenges of driving a car without human assistance were more formidable than anticipated. Davies profiles the industry's key players from the early enthusiasm of the DARPA days to their growing awareness that while this spin on artificial intelligence isn't yet ready for rush-hour traffic, driverless cars are poised to remake how the world moves. *Driven* explores this exciting quest to transform transportation and change our lives.

Techniques to help drivers overcome the mental barriers that prevent successful racing.

Ultimate Speed Secrets is the drivers' guide to going faster! Professional race instructor Ross Bentley has raced everything from Indy cars to world sports cars and has the experience to make any racer a more complete driver. With detailed drills and comprehensive instructions, Bentley covers everything you need to know: choosing lines; adapting to different cars, tracks, and racing conditions; setting up controls; and understanding car adjustments and mental preparation. Whether you are racing an Indy car or simply interested in becoming a more complete driver on the street, *Ultimate Speed Secrets* will give you the information you need to succeed!

With its solo set-up, more subdued speeds, and endlessly varying events and courses, autocross is the easiest, safest, and least expensive way to get into motorsports. Anyone with a helmet and a car can do it. Of course, it doesn't hurt to have some driving skills, which is where this book comes in. As a veteran racer and professional driving coach, Ross Bentley knows what it takes to compete and to win, and he gives readers the benefit of that knowledge in *Speed Secrets 7: Autocross Driving Fundamentals*. The first in the *Speed Secrets* series to address a specific form of racing, this volume focuses on the skills critical to autocross success: car handling and driver skill at high speeds on unique courses. Though slower than other motorsports in absolute terms, autocross, with its high number of turns per minute, can challenge even the most expert driver. Adapting his time-proven method of teaching drivers how to go fast, Bentley clearly details the steps and techniques that help autocross drivers maintain control and dominate a course at speed. Though specific to autocross, and essential to mastering its particular challenges, his advice and instruction in this book will prove invaluable to drivers who go on to road racing as well.

This complete racer's reference is the perfect resource for all drivers from novice to expert. The fundamentals of fast driving are revealed in this definitive how-to book for racers. You will find the competition-proven methods of instructors and of professional drivers that will give you the know-how to work up the track and stay at the front. Interested in the world of racing? Just think, you can have all of the lessons and insights from Skip Barber instructors and from professional racers compiled in one handbook. This racing reference reveals the secrets of mastering car control, reducing lap times, as it takes the reader inside the world of racing. *Going Faster!* is the definitive book for the active race driver, the racer-to-be, and the auto-racing fan who wants to know what driving a racecar is really about.
